INSTALLATION SPECIFICATIONS
<p>AIT strongly suggests the use of a suitable structural security framing with an appropriate protection rating. Allow for a minimum of a (1) inch edge engagement in the frame with sufficient rabbet depth to allow for expansion (approximately 1/16"/FT).</p> <p>** ALWAYS INSTALL WITH SPALL SHIELD TO "PROTECTION" SIDE **</p> <p>For applications that do not require no-spall, or where glass is preferred on both sides, use AIT GCPI ballistic products.</p> <p>Larger lites may require deeper edge engagements. It is imperative to the life and durability of certain composite types that compatible sealant or gasket material is used on both sides of the laminate. An appropriate sealant solution can be specified by AIT if required. The AIT Group produces the finest glass and composite laminates in the world, proper care during installation will ensure years of superior performance.</p>

ADD-ON OPTIONS & ADDITIONAL INFO
<p>Additional options include: Instantly switchable SmartGlass electronic privacy add-on, Pilkington Mirropane®, Hard Coated Low E, Insulated Units, Tints, Fire resistant glass, Graphics or decorative Smart Designs, and more.
